

# Stuttering Treatment:

## Clinically important recent and current treatment developments

The intention of this two-day workshop is to be interactive; participants will learn about the recent and current treatment developments of stuttering and will have a chance to practice them in small groups through the use of case studies.

Friday, 28<sup>th</sup> and Saturday, 29<sup>th</sup> of May 2010, 9,00 - 17,00  
Children's Hospital Zagreb, Klaićeva 16, Zagreb, Croatia

Professor **Mark Onslow** is the Foundation Director of the Australian Stuttering Research Centre at the Faculty of Health Sciences, The University of Sydney. His background is speech pathology, in which field he holds

a Bachelor of Applied Science, Master of Applied Science, and a Doctorate. He currently is the Associate Dean for Research and Innovation in the Faculty. Professor Onslow's research interests are the epidemiology of early stuttering in preschoolers, mental health of those who stutter, measurement of stuttering, and the nature and treatment of stuttering. The Australian Stuttering Research Centre has published the majority of the world's speech pathology clinical trials for stuttering treatment. Recently, work has begun at the Centre to apply information technologies to stuttering treatment.

### Topics to be covered:

- Critical concepts of stuttering treatment
- Timing of early intervention
- Control of early stuttering
- Control of advanced stuttering
- Measurements and treatment of social anxiety

Fee 1.000 kn + PDV or € 170

Discounted Student Fee\* 500 kn + PDV or € 85

\*Regular undergraduate students; students need to enclose the confirmation of their faculty that they are a student

**Logopedski centar (LC)** was founded in 1997 with a view to organizing permanent training for specialists in the field of communication disorders – speech and language therapists and other specialists in related

fields. Soon after its foundation LC extended its activities to assessing, diagnosing and treating children and adults with speech and language impairments as well as counseling and educating parents.

In order to offer comprehensive assessments and therapies LC works with professionals in medical and related sciences. LC also collaborates with kindergartens, schools and other institutions, by conducting both treatment and counseling as well as educating their employees about speech and language impairments and their role in helping those in need. Besides organizing education for their collaborators, LC organizes education for all speech and language therapists through seminars and workshops.

Please note that the number of participants is limited and participation is on a first come, first served basis.

**Payment:** Registration must be accompanied with the fee payment. Without the fee payment participation can not be confirmed.
